

BA/MIA and MIA: Country/Regional Specialization

All students must complete at least one country/regional specialization chosen from: China, Japan, Korea, Latin America and Southeast Asia.

A country/regional specialization is made up of two courses: one on the economy and a second on the political system of your selected region or country.

Dual specialization requires the student to complete the coursework and language requirement for both regions. Courses taken for a country/regional specialization may not be double counted.
