

Appendix A. Additional Tables and Figures.

Appendix Table A1. EPIICA survey and activity timeline

Time:	Survey Activities:	Sales Activities:	Payouts:
2011			
Jan – Mar:	Round 1 Survey (baseline)		
2012			
Jan – Mar:	Round 2 Survey (reduced sample in panel)		
July-Aug:		Season 1 sales, standalone only	
2013			
Jan – Mar:	Round 3 Survey (panel)		
Apr:			Season 1 sales payouts.
May-Jul:		Season 2 sales, standalone only	
2014			
Jan – Mar:	Round 4 Survey (panel)		
Apr:			Season 2 sales payouts.
Apr-Jun:		Season 3 sales, takeup only of interlinked in Feres Wega	
2015			
Apr:			Season 3 sales payouts
2016			
Jan – Feb:	Round 5 Survey (Feres Wega village only)		

Appendix Table A2. Correlation between EPIICA payouts and survey-measured agricultural shocks.

		Shock according to survey-based measure of yields		Total
		No	Yes	
Index insurance would have made payout	No	62	9	71
	Yes	17	10	27
	Total	79	19	98

Shock is defined as the kebele/year deviation of the yield index from the kebele mean being in the bottom 20% of the distribution. Both sales years pooled.

Table A3. Baseline Summary Statistics by Region.

	Total	North Shewa	West Gojam	South Wollo	North Wollo
Number of Households	1150	388	363	260	139
Share of Households in the Zone (%)	100	100	100	100	100
Average Household Size	5.3	5.5	5.8	4.6	4.99
Number of adult equivalents	4.5	4.7	4.8	3.9	4.23
Average age of the head (years)	49	51.2	46.1	48.9	50.53
Sex of household head (%)					
<i>Male</i>	90.7	90	93.7	89.2	87.77
<i>Female</i>	9.3	10.1	6.3	10.8	12.23
Type of hhld head 's education					
<i>No Education</i>	51.4	43	62	46.3	56.82
<i>Formal Education</i>	21.5	22.2	17.1	26.6	21.97
<i>Informal Education</i>	27.1	34.8	20.9	27	21.21
Duration of hhld head's formal education (years), excluding hh heads with no formal education at all	4.8	5	4.5	5	4.14
Hhld head can read and write in local language					
<i>Read only</i>	8.2	11.6	3.6	11.2	5.04
<i>Read and Write</i>	35.3	34.3	32.8	38.6	38.85
<i>Cannot read or write</i>	56.5	54.1	63.6	50.2	56.12

Treated Village		-0.0970 (0.100)		0.00966 (0.0568)
Household will receive voucher			-0.0795 (0.0551)	-0.0795 (0.0563)
Household will receive training				-0.00194 (0.0189)
Constant (mean attrition in omitted group)	0.701*** (0.0786)	0.701*** (0.0786)	0.0903*** (0.0238)	0.0903*** (0.0238)
Observations	2,158	2,158	882	882
R-squared	0.010	0.009	0.028	0.028

Regressions run at the household level among all cooperative members, using full baseline samples and clustering standard errors at the village level to account for the design effect. Outcome variables are dummies for attrition from village-level study sample (lack of drought exposure or unre-insurable rainfall station), and attrition from the household survey in panel villages, respectively. Regressions present pooled OLS analysis, weighted to be representative of cooperative members in study villages. *** p<0.01, ** p<0.05, * p<0.1

Regressions present pooled OLS analysis, weighted to be representative of cooperative members in study villages. Data includes two pre-treatment rounds for some variables and one for others; all variables have two post-treatment observations. Voucher treatment re-randomized at the individual level in rounds 3 and 4. Robust standard errors are reported in parentheses, clustered at the village level to account for the design effect. *** p<0.01, ** p<0.05, * p<0.1

Table A9. Heterogeneity in Impacts for Non-Cooperative Members.

	Bought Insurance	Sum Insured	Any Chemical Fertilizer	KGs of Chemical Fertilizer	Number of crops using Chemical Fertilizer	Uses any Improved Seeds	Uses any Input Credit	Total Value of Inputs Used	Index of Agricultural Yields	HH Income per Capita

Table A11. Descriptive Statistics from Feres Wega where the Interlinked Loans were Marketed.

Reported Changes in Input Use:

Input:	Number Increasing	% Increasing	Number Decreasing	% Decreasing	Number with No Change
Local Seeds	20	18.5%	3	2.8%	85
Improved Seeds	28	25.9%	5	4.6%	75
Organic Fertilizer	28	25.9%	5	4.6%	75
UREA	72	66.7%	9	8.3%	27
DAP	70	64.8%	9	8.3%	29
Insecticides/Herbicides	17	15.7%	2	1.9%	89
Veterinary Services	7	6.5%	0	0.0%	101
Other Livestock Inputs	4	3.7%	1	0.9%	103

Data come from the Round 5 survey conducted only in the village of Feres Wega where interlinked insurance was successfully sold.

Appendix Figure A1. CDFs of Survey-Measured Yields, by Insurance Payout Status.

Appendix Figure A2A. Map of Rainfall Stations and the Study Area.

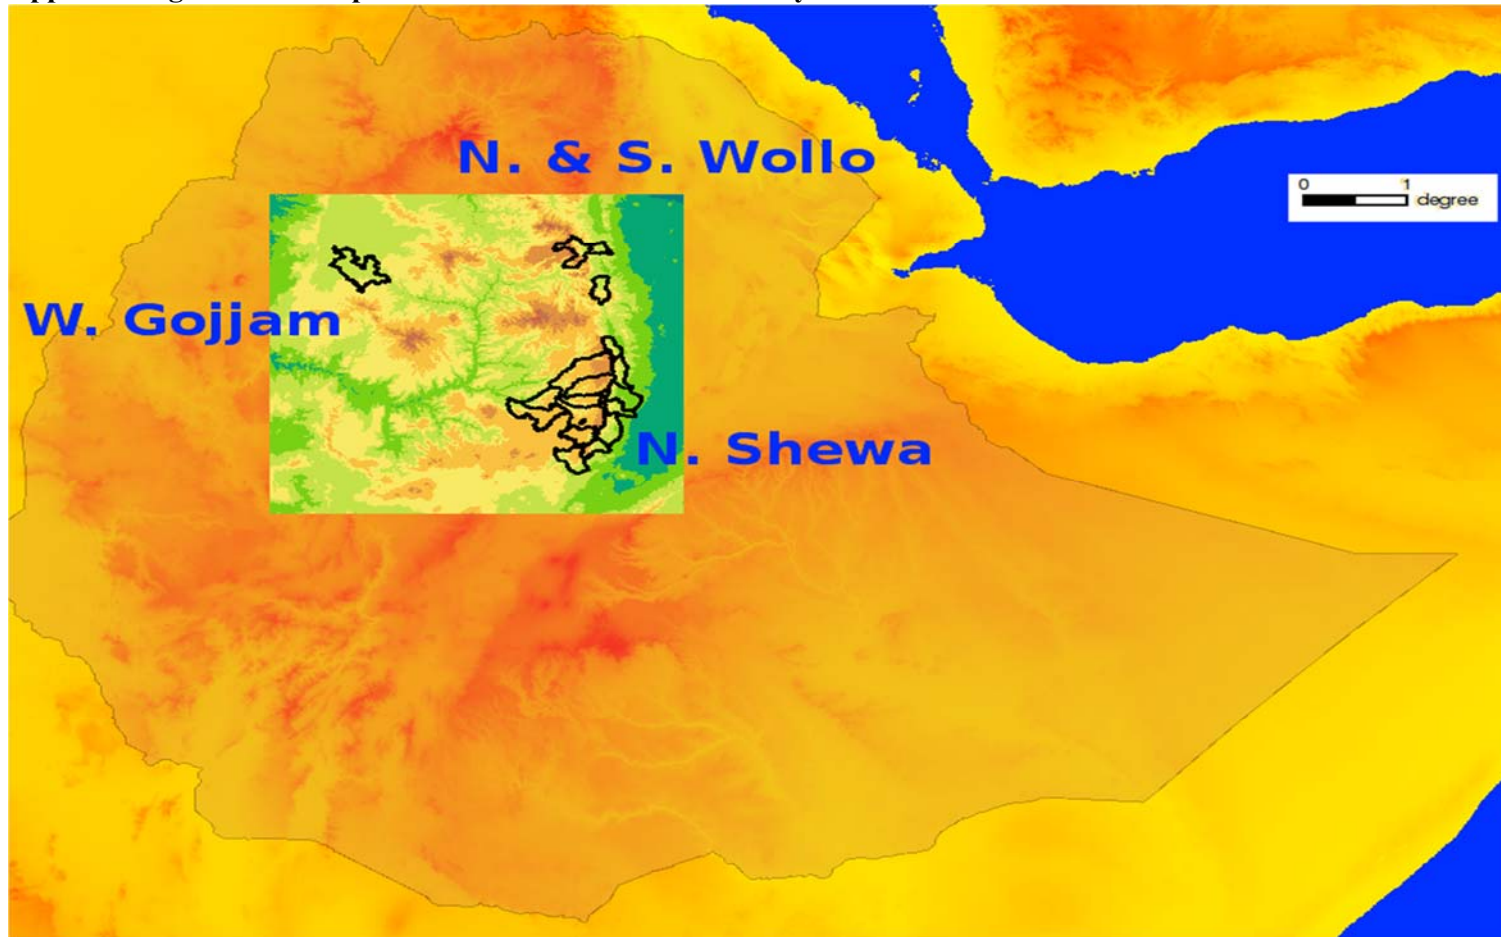

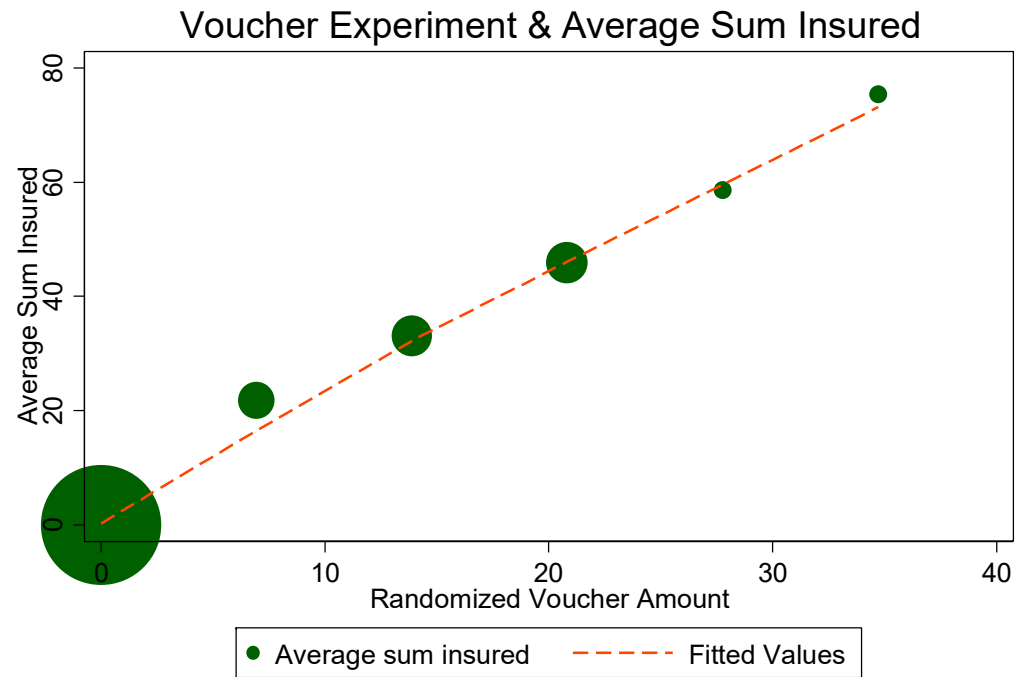

Figure A2B. Map of study woredas (drawn in lines) and rainfall stations (along with their 20 km perimeter).

Source. Ethiopian statistical agency and NMA.

Note. The red dots represent study village locations, and the the light blue circles are centered around the rainfall stations. The black lines represent geographical boundaries of woredas (larger administrative regions each including several villages or kebeles)

Figure A3. Average Sum Insured by Randomized Voucher Amount.

All values in 2010 US\$. Size of dots proportional to number of observations at each assigned value.
