

China's Pending Airpocalypse

How can Science and Policy Forestall the Inevitable?

Junjie Zhang

Assistant Professor of Environmental
Economics, IR/PS

Dec. 2, 2014

11:30 a.m. – 1 p.m.

Deborah Seligsohn

Ph.D. Candidate at the Department of
Political Science, UC San Diego

**Faculty Club,
UC San Diego**

IR/PS Science Policy Fellows Program Inaugural Event

In this first-of-its-kind event for the School of International Relations and Pacific Studies, professor Junjie Zhang, an expert in Chinese economics related to the environment, and Ph.D. candidate Deborah Seligsohn will discuss the intersection of policy and science in relation to China's pollution problem. Seligsohn, of UC San Diego's Department of Political Science, is studying environmental governance.

Joining the discussion is IR/PS professor Barry Naughton, a leading scholar on economics in China. The event is being hosted by the IR/PS Science Policy Fellows Program. In its inaugural year, the interdisciplinary program offers fellowships to select students from Jacobs School of Engineering, Scripps Institution of Oceanography and the UC San Diego Medical School to explore the policy implications of their research with IR/PS faculty.
